

## IST 263 Project Milestone 4 – Wireframes

**Name:** Maria Ruelas

### **Description:**

Please paste your project description from Project Milestone 1 here (or most current if you've changed your project idea).

*For my website, I would like to design a portfolio showcasing my best photography and graphic design work. The first page of my website will have information about me and my goals. This will include a short biography, my hobbies, and how I started my journey into graphic design and photography. The second page will display my graphic design work, while the third page will display my photographs. My final page will have my contact information and a form to fill out.*

### **Research:**

Write down the urls of three websites you looked at to research layout for the type of site you are creating. For example, if I was creating an auction website, I might look at pages on <https://www.ebay.com/>.

url1	<a href="https://www.lynnjohnsonphoto.com/portfolio">https://www.lynnjohnsonphoto.com/portfolio</a>
url2	<a href="https://www.chrisburkard.com/Pages/Portfolio">https://www.chrisburkard.com/Pages/Portfolio</a>
url3	<a href="https://www.ameliaallenphotography.com/">https://www.ameliaallenphotography.com/</a>

### **Wireframes:**

Use MockFlow or another diagraming software to create layouts for your pages. Consider the following:

1. Where is your navigation going to be located on every page.  
My navigation will be at the very top of the page and it will stay consistent on every page.
2. Will you need a footer?  
I will do a decorative footer with some copyright and disclaimer statements.
3. How can you make a layout that is visually interesting and helps communicate your site content?  
I want a layout that flows properly and takes the viewer smoothly down the page, hinting at the fact that there is more below and they should scroll. I also want to utilize big, bold titles to label each section and bring attention to them. By having a lot of images, arranged carefully and in an organized way, I will also be able to make a visually interesting site. I will also choose a color palette that stays consistent throughout.
4. Don't forget you must have at least 2 distinctly different page layouts.

### Paste Your 3 Page Layouts Below
